MILIKOLOSSKRIEG

RADICAL TRANSFORMATION

are not here by coincidence. We are instruments of disruption, and our cause is the complete dismantling of a decaying world order. We shall provoke conflict ethnic, religious, ideological and we shall plant seeds of misanthropy deep within the global psyche Radical transformation demands radical means. We shall infiltrate security and turn it into fear. We shall endorse and facilitate any movement aligned with our objectives. As of 2025, the wheels are in motion. Loyalty will outweigh trust, and no place will be given to sentiment. Those deemed ineffective will not be expelled they will be reassigned to peripheral roles, functioning under strict information containment Our structure will remain compartmentalised. The “need to-know” principle shall be absolute. Psychological resilience, detachment, and operational silence are prerequisites. Those capable of brutal clarity sadists, psychopaths, and misfits will find sanctuary here, provided they do not flinch when action calls Operational security (OPSEC) will be implemented gradually. Anonymity is not just strategy it is survival. Personal identity is irrelevant. Capacity and will are the only currencies we recognise. Adaptability is sacred; evolution within the system is inevitable. Each operative will be valued for action, not appearance In this grotesque system, we remain embedded until the moment we can rip it apart. You will not wear your identity on your sleeve. Your presence will be spectral. Should you live among many, you will turn some. Share the invitation, expand the ranks The Province system, under the stewardship of MSK “Milikolosskrieg”, governs the responsibility and coordination of cells within each operational territory We shall not wait for the world to crumble. We will strike the cracks ourselves

THE IMITATION CROWD

The imitation crowd has no place among us and never will these people are usually uninspired and lack depth they get briefly excited by surface level edits and sensational material confusing fleeting interest with genuine belief they do not have leadership qualities and exist on the margins trying to boost their fragile egos they do not have a true misanthropic nature they just want attention and recognition their thinking is shallow and so they borrow bits of information from better established groups in hopes of forming their own weak and poorly thought out collectives but imitation without substance is obvious and pitiful if we detect such individuals those who only pretend and do not act they will be removed immediately we do not make space for grand illusions or those who live through ideas that are not their own

ON RECRUITMENT

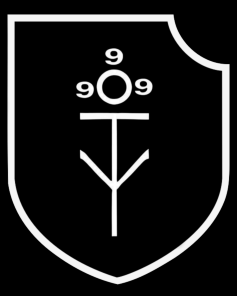
Recruits shall be of a certain calibre while the typical age of entry lies around sixteen to seventeen years age alone is not the measure we seek temperament maturity of thought discipline of action and a disposition attuned to radical transformation are non negotiable traits these individuals are not merely young they are agile sharp and unyielding in spirit their inclusion is not incidental it is structural they form the spine of motion the energy that drives the machine within the ranks respect is absolute disputes ego or internal dissension shall not be tolerated those who stand with us are bound to the same purpose discipline binds us distraction dissolves us

ON PERSONAL INFORMATION

Anonymity is a pillar of our structure we do not seek personal details beyond the bare essentials required for functional cohesion this principle is not mere preference it is a safeguard the integrity of our organisation depends on discretion not disclosure members are not to be interrogated approached or questioned by outsiders journalists or agents our affiliation with O9A underscores our stance identity is irrelevant intent is everything privacy is not optional it is absolute

THE STRATEGIC OUTLINE OF MILIKOLOSSKRIEG

Until the operational network of Milikolosskrieg reaches a threshold of 120 active participants its members shall engage in acts of urban disruption These shall include but not be limited to targeted property damage interference with vehicles such as the deflation or destruction of tyres unauthorised appropriation of goods defacement of public or private surfaces and incursions upon educational institutions during nocturnal hours Once the collective surpasses the figure of 120 operatives the nature of its engagements shall evolve into broader more coordinated actions conducted on a significantly larger scale



ON MEMBER RECRUITMENT

Those who earnestly seek radical transformation are encouraged to stand among our ranks We shall advance with purpose unshaken in resolve There shall be no retreat Senior leadership shall emerge through merit as each member is tested beyond their perceived limits Our operations will be driven by volunteers willing participants in the undoing of a decaying system. The task ahead is formidable, but not insurmountable. We intend to sow the seeds of misanthropy methodically and without remorse If you recognise yourself in this cause you need not hesitate Join us!
